1. How do you define open space?

View responses to this question [view](#)

Total Respondents	99
(skipped this question)	17

2. How do you use open space?

View responses to this question [view](#)

Total Respondents	101
(skipped this question)	15

3. How often?

	Response Total	Response Percent
1-5	0	0%
6-10	6	6%
11-20	15	15%
21-50	24	24%
More than 50 times a year	56	55%
Total Respondents		101
(skipped this question)		15

What type of open space is more important to you?

- 4.
- Active Recreation (for example athletic fields, recreation centers, and pools).
 - Passive Recreation (hiking, walking, and bike riding).
 - Critical or rare habitat, watersheds, forests, and wetlands.
 - Viewsheds or vistas.
 - Historic sites (historic houses and archaeology sites).

		Response Total	Response Percent
Active Recreation		7	7%
Passive Recreation		33	31%
Critical Habitat		22	21%
Viewsheds/Vistas		6	6%
Historic Sites		1	1%
Other, please specify view		36	34%
		Total Respondents	105
		(skipped this question)	11

5. What are the **second** most important characteristics of open space?

		Response Total	Response Percent
Active Recreation		9	9%
Passive Recreation		35	35%
Critical Habitat		32	32%
Viewsheds/Vistas		8	8%
Historic Sites		8	8%
Other, please specify view		9	9%
		Total Respondents	101
		(skipped this question)	15

6. What are the **third** most important characteristics of open space?

		Response Total	Response Percent
Active Recreation		14	14%
Passive Recreation		9	9%
Critical Habitat		15	15%
Viewsheds/Vistas		23	23%
Historic Sites		27	28%
Other, please specify view		10	10%

Results Overview

Parks and Open Space Survey**Respondents:** 116**Status:** Open**Launched Date:** 11/28/2005**Closed Date:** N/A

1. How do you define open space?	Full Response
1. Large areas of land not developed for housing, commercial, etc.	view
2. Space absent commercial development. Space used for traditional single family livelihood such as farming, living off the fruits and bounty of the land. Space preserved for recreation and enjoying the natural beauty, with minimum development for access.	view
3. A forest where you can walk for 15 minutes without seeing houses, or hearing cars.	view
4. Forest and lawn areas, natural habitat No cars or roads, no motorized vehicles.	view
5. An undeveloped, undisturbed area where I can go either alone or with my kids to enjoy and experience nature. This includes places for fishing, hiking, and mountain biking. It needs to include an area for picnicing, with tables and benches.	view
6. I define Open Space in terms of both external open space and internal open space. External Open Space consists of those areas that are devoid of structures, development and utilities that are suitable for outdoor parks and recreation activities such as hiking, biking, ball playing, kite flying, jogging, fishing, hunting, etc. External open spaces also include environmental protection areas and watershed areas. Basically open areas contain no housing, shopping, powerline, gas lines, etc. and include an adequate buffer zones between such development. Internal Open Space consists of small treed or grassed or landscape areas within a housing or shopping development which conveys a message that the area is not overcrowded. This means adequate separation between houses and buildings, adequate setback distance from streets and utilities, and adequate separation buffers between facing homes or businesses located on adjacent streets.	view
7. Space that is non-commercial and is available for leisure-type and recreational activities.	view
8. Open areas for the purpose of playing, whether kids playing or sports.	view
9. Open space could be different things in different situations. For instance one definition could be undeveloped land, another could be an open field or area like a soccer or other athletic field or just an area providing a nice view.	view
10. Any areas without residential or commercial development.	view
11. Publicly accessible.	view
12. For me, open space means areas free of the clutter of buildings and the noise of traffic. A place where one can enjoy nature, peace and quiet.	view
13. areas designated for preservation as farmland, historic sites, forest and parks, within which no commercial, residential and other forms of development may be done.	view

14.	Wooded areas and developed natural spaces such as parks, walking paths, recreational areas. It is also areas for natural habitats, streams, etc.	view
15.	Land in its natural state. Typically trees, grass, wildlife, etc. with some limited public facilities like rest rooms possibly.	view
16.	parks, forrests, farms	view
17.	Land/water/air free of home and business construction. (I say "air" b/c I am not just talking about building footprints, but how high they go, too!) I guess that my definition of open space includes green space.	view
18.	Land not covered with housing plans or shopping centers.	view
19.	Open space is a large park, land that is not being used by man for commercial use or housing, somewhere one can see grass and trees, a place where a dog or child can run, land that is saved for conservation, a bird sancutary, a dog park, a park like Burke Lake, state parks, federal parks, preserving the enviroment, etc.	view
20.	"Natural" - could be wooded or open fields or a mix. Does not have to be a large area - can be a development with large lots not postage stamps where trees, brush and yes, landscaping combine to make walking or biking more in step with birds etc. than just house fronts.	view
21.	Space unoccupied by any buildings or improvements and undedicated to any purpose (including recreation). This is a very strict definition. A looser definition would include parks and recreation areas.	view
22.	It is untouched land with natural habitat which breaks up the urban landscape of houses and buildings.	view
23.	An open space is a place you can go to enjoy nature. It is nice to go somewhere where you can not see houses or stores and hear very minimal traffic noise.	view
24.	Space unoccupied by commercial or residential structures	view
25.	where ever I can find a horse trail	view
26.	Ball fields, equestrian rings, trails - for people, horses or bicycles	view
27.	Open space is an area of land that is valued for natural processes and wildlife, for agricultural and sylvan production, and active and passive recreation and/or for providing other public benefits.	view
28.	open land notimproved	view
29.	Open space is space (land) for the public and their use, walking, hiking, running, picinicing, cycling, horseback riding, and team sports. This space is dedicated to the public unconditionally and will never be used for roads, housing, infrastructure.	view
30.	Provide equestrian trails as well as hiking trails	view
31.	Open space is space that is free of roads, buildings and is open to the public to use for hiking, biking, horseback riding, etc	view
32.	The no poeple living on or working in space.	view
33.	No development in sight, just a path to ride my horse. Trees, open fields, no roads/cars.	view
34.	grass, trees, any place that doesn't have a subdivision or asphalt on it	view
35.	Open space is land in it's natural state available to use and enjoy by all as it can be used IN IT"S NATURAL STATE, or with as little disturbance as possible. Open space is NOT golf courses, soccer or baseball fields or pools. It IS hiking, biking, picnicing and trails for equestrian use.	view
36.	Space that is not developed and still has natural characteristics that are not disturbed.	view
37.	All of the above but to include horse riding.	view
38.	Land that has not been "developed"	view

39.	As space not crammed with so many houses! I play golf but usually go outside of Prince William to do so to get away from gated communities and their unreasonably high price tags. I also have horses on my property and because of traffic, I now have to trailer my horses to ride (usually outside of Prince William County). Please provide safe, open spaces for people to ride their horses within the county. We're becoming a mockery to the rest of the state. Rita Mae Brown, well known author and equestrienne who lives in Afton, calls this area "Occupied Virginia". How sad.	view
40.	Open space should involve preservation of the land in it's natural state (i.e., allowing at least 50% of the space to remain or return to a natural forest, meadow, wetland, etc.) while setting aside some smaller portion for community recreation, such a trail system (walking, biking, and horseback riding), a limited number of athletic fields (both for human and equine sports), and picnic areas and playgrounds.	view
41.	Large areas set aside for non development	view
42.	Open space is a place where I can ride my horse and other people can enjoy walking, jogging and playing sports.	view
43.	Space that is free of buildings and roads.	view
44.	I define open space as land that has not been developed commercially.	view
45.	Large tracts of land-fields or forests-that are essentially undeveloped, i.e., other than trails, there are no man-made structures. The vegetation may be managed for improved wildlife habitat.	view
46.	Fields, forested areas, natural-surface trails, parks.	view
47.	Space useable for multiple activities including hiking, games playing, equestrian activities such as trail riding, ring work and competitions.	view
48.	Preservation of viewsheds or historic vistas, historic and archaeology sites, and cemeteries, Preservation of sensitive environments, stream valleys, farmland, Preservation of watersheds for drinking, Preservation of forests for clean air, Preservation of land for passive recreation, such as HORSE RIDING, hiking Preservation of land for active recreation, such as EQUESTRIAN COMPETITION	view
49.	No asphalt parking or street lights. Clusters of shade trees in wide open fields of wildflowers and grass. No ugly "man-made" structures. Quiet, peaceful, off the main road.	view
50.	Unencumbered by asphalt...lots of trees and trails	view
51.	Preservation of land for Horseback riding & trails throughout the community.	view
52.	Open space is land that is set aside from residential/commercial development. The land allows citizens to get away from stress and to learn and enjoy the environment. Natural trails for horse back riding are basically non existent in PWC. The Nokesville areas growth is based on equestrian home sites. The Nokesville park has a trail that is about 1-2 miles. These trails could be used for both horseback riding and hiking-EX: Manassas Battlefield trails.	view
53.	Primarily undeveloped or at the most, minimally developed fields and forests that are left primarily as an unimproved land bank. Think of the Manassas Battlefield.	view
54.	Undeveloped natural space used to preserve areas or provide a natural environment for hiking or equestrian trails.	view
55.	Space that is accessible to the greatest numbers of users and as many varied activities and interests that preserve the land and the heritage of the area.	view
56.	LAND THAT IS RESERVED FOR HORSES TO BE RIDDEN AND ENJOYED BY THE TAX PAYERS OF P.W.C	view
57.	Land that is undeveloped	view
58.	Space that allows undisturbed growth of native plants, provides habitat for animals, and preserves land and historically significant areas (including things like graveyards and old buildings). This space can be used by human beings if it is not disturbed.	view

59.	Open space is area where anyone can enter, use for personal recreation, social recreation - preferably with trees, grass, some facilities - but generally an area to escape from the concrete, roads, hustle bustle of the everyday life.	view
60.	fields and woods mixtures largely uninterrupted by roads and man made structures	view
61.	No roads, no construction of buildings	view
62.	a place where people can get together with their horses and friends.	view
63.	natural land areas with no development	view
64.	Land that is used for non-commercial purposes. It can be used for recreation or left just wild and natural.	view
65.	Property(fields and wooded areas alike) which has not been changed over the years and is "open" for all to enjoy. Especially property that includes trails for equestrians.	view
66.	Areas on which I can ride my horses	view
67.	land for passive recreation, such as horseback riding, hiking, walking and bike riding	view
68.	Large numbers of contiguous acres of land that are not, and can never be, developed in any manner whatsoever. Open space contains equestrian trails, streams, forests, meadows, nature sanctuaries, hiking trails, wild flowers. Open space does not have paved roads, soccer and softball fields, paved parking areas, or access for any type of motorized vehicles, including 4 wheelers.	view
69.	Open space is an area free of buildings that is available for recreational use for the public.	view
70.	Lots of free access to ride!	view
71.	Land that is NOT developed, bulldozed or paved over.	view
72.	Areas that are wooded or in natural grasses/weeds, or agricultural property	view
73.	Open space is space without buildings and sidewalks. It is natural and can be used for walking, horseback riding, picnicing, etc. It feels peaceful.	view
74.	Land with no buildings and public roads.	view
75.	Open space is an area that is free from housing or commercial development, that is available to the general poulation for multiple uses; anything from a sunday picnic to organized sports to hiking, biking or activities such as horseback riding.	view
76.	Fields or woods with no houses or business on it	view
77.	Natural land; improved with equestrian or natural surface multi-use trails. Year round access.	view
78.	Any public area that can be enjoyed by the public. Trails that are multi use/ hikers, trail riders (Horses)bike riders, No motorized bikes. Open space can have trails or be an area for the public to picnic, play ball, ect.	view
79.	Open spaces are public spaces kept in their natural state and available for non-invasive outdoor recreational activities such as horseback riding, bike riding, hiking, and camping.	view
80.	Outdoor spaces that are not developed - parks - large farms - timberlands, wetlands, recreational areas (not sports parks), etc.	view
81.	Space that is "natural" ie not "modified" or "improved". Also space that is accessible to the public for recreational use.	view
82.	Open space is land that is free of human development, available to wildlife and people to use in a way that is compatible with wildlife.	view
83.	Land that has been minimally disturbed and is protected from future construction	view
84.	miles of natural fields and forest.	view
85.	Open space is land that is not developed for housing, shopping centers, parking lots, commercial buildings, etc. To me, open space is land such as a park or a conservation area that has been excluded from being developed and could be used for recreational use by the public.	view

86.	Open space is land that has been cleared or occurs naturally without forestation, and has not been paved or otherwise covered with any substance or object that would inhibit the natural growth of vegetation.	view
87.	That is a problem. The Zoning Ordinance has a definition for Open Space and one for Natural Open Space. My definition is a combination of both - space that allows for either passive or active recreational activities.	view
88.	Open space is where there are no houses/structures.	view
89.	Areas in as natural a state as possible; a paved area is the worst, a regularly mowed area (like playing fields) are second worst. Natural or slightly managed woodlands are the best (removing invasive non-native species would be good management) and area of infrequently mowed grass interspersed with woodlands are next best.	view
90.	Without development or structures.	view
91.	Space the radical Prince William Conservation Alliance wants to turn into a taxpayer funded liberal indoctrination center to help provide additional taxpayer funds to Nature's Wonder World Inc.	view
92.	All of the above in addition to being able to have a buffer between the highways and commercial/residential areas	view
93.	Open space is land that is not developed in any way. It is wooded or could be maintained as natural woods, shrubland or grassland, could have a dirt trail through it, but would have no pavement no structural facilities and no formal recreation activity occurring on it. A golf course, for example, is not open space.	view
94.	Land not developed for commercial, residential, highways, storage, - natural land, meaning tread upon lightly in all respects, left and managed for wildlife and plants (trees, shrubs, herbaceous) allowing natural resource systems - land and waterways of the watershed - to function together with minimal human interference benefiting people and the fauna and flora. The goal to reduce fragmentation of forests and lands now so there will be some for the future.	view
95.	Related to your above list of functions, I would not include historic sites, cemeteries, or land for active recreation in open space. These sites are just not developed for residential or commercial purposes. They do not generally provide the benefits for wildlife, habitat, watershed protection, etc. that I would attribute to open space.	view
96.	Natural open space is a forest of trees. Open space that is not "natural" open space can include parks/fields with trees.	view
97.	Available to the public for multi-use.	view
98.	A area of land that is not covered with homes or businesses. Visibility should only be obstructed by trees or other land masses.	view
99.	Any space that is vegetated, whether forest or meadow, and can serve as habitat for wildlife and provide passive recreational opportunities for people. I might be convinced that athletic fields could qualify as open space, but not rec centers or pools (concrete and asphalt have no place in open space). Historic sites are trickier. Manassas Battlefield could be open space, but not necessarily Weems Botts Museum. Every site that isn't a home or shopping center is not automatically open space.	view

Results Overview

Parks and Open Space Survey**Respondents:** 116**Status:** Open**Launched Date:** 11/28/2005**Closed Date:** N/A

2. How do you use open space?	Full Response
1. Recreation, sports, hiking, enjoying the scenery	view
2. Walking, hiking, jogging, bicycling, viewing, picture taking (photography), historical significance	view
3. Picnics, family activities, and passive recreation.	view
4. Jogging or walking with my family	view
5. Mountin biking, fishing, walking/hiking, picnicing, discovering nature with my children.	view
6. Open space is a major contributor to rest, relaxation, and recuperation from the overcrowding on the roads, shopping areas, and housing complexes. Basically, it serves to be available to residents to allow them to "commune with nature" and have some "quiet time" without the constant on-rush of a crowded community.	view
7. hiking, exploring, exercising and relaxation	view
8. Mainly softball, football and letting the kids run around.	view
9. I use open space as athletic fields, Hiking in the woods, Playing with my kids, having a picnic, camping, fishing, letter boxing	view
10. golf	view
11. Hiking, walking, biking, dog exercise	view
12. I use open space for hiking, walking, bicycling, meditation, and an opportunity to enjoy nature's many gifts.	view
13. hiking, cycling and other sporting activities	view
14. Recreationally with my children. We visit and play local parks.	view
15. Hiking, picnicing, nature walks, running trails, bike trails, camping. We really need more indoor pools as well.	view
16. dog parks, hiking, biking, enjoy looking at....sometimes nothing, that's why it's 'open'	view
17. Depending on the type of open space, it can be used for recreation, for wildlife, and overall just to prevent overdevelopment of an area.	view
18. hiking, sports, enjoying nature, (deer, trees, wildlife)	view
19. As a family we hike all the time. We enjoy something scenic like Leesylvania State Park or around an historic site, we take our child to a park on a regular basis and we take our dog to dog parks.	view
20. Walk, cycle	view

21.	It's not to be "used," to my way of thinking. It is there to balance (ecologically and aesthetically) all of the non-open space. Some people may use it to go walking, but by definition, it would not offer parking, so even that use would be limited. It buffers residential areas from roads, businesses and other residential areas. It provides space for wildlife, and buffers residential areas from over-visitation by some wildlife, as well as protecting wildlife from human encroachment.	view
22.	I enjoy looking at open spaces and the wildlife that inhabit them.	view
23.	My children and I enjoy going to parks and camping. We also like to have picnics and going fishing.	view
24.	Hiking, bike riding, picknicking	view
25.	trail riding with my horse	view
26.	Equestrian rings, trails	view
27.	I use it for equine related activities.	view
28.	trails,equestrian ,nature ,hiking	view
29.	I use open space, Manassas Battlefield, every weekend, usually both days, to ride my horse. I will meet my friends there and we usually ride for 3-5 hours. We will ride under 66 to ride into Bull Run. As you can see we NEED more public horse trails.	view
30.	Both for riding horseback and hiking.	view
31.	I use it for horseback riding.	view
32.	Take my dogs to walk and play.	view
33.	By riding my horse and enjoying the scenery!	view
34.	trail riding, pleasure equestrian activities	view
35.	Hiking, biking and horseback riding	view
36.	I enjoy trail riding and find it appalling that there are not more trails available to equestrians through the county.	view
37.	horse riding and hiking	view
38.	Horsebackriding, mountain biking	view
39.	Horseback riding and golf PLUS getting away from developers who have clearly been allowed carte blanche with our precious natural resources!	view
40.	The use of the open space should reflect the needs of the surrounding properties. In a suburban residential area, the space should be primarily for group sports (soccer, baseball, etc). In a rural area, more emphasis should be given to extensive trails and equine sports. As stated above, in all cases, at least 50% of the open space should remain "wild" to preserve or create natural habitat for existing or re-introduced native species. In Pr. Wm. Co., I use only the two small trails, one in Nokesville Park and one at Valley View, for walking and horse-back riding. I enjoy the peace that these two parks offer since I do not participate in group sports.	view
41.	As a stream buffer, as environmental cleansing areas, for parks and rec type activities (trails/paths), as a nature preserve, as historical preservation areas, I personally use it to enjoy equestrian activities...and to appreciate nature.	view
42.	hiking, mountain biking, horse back riding.	view
43.	I ride my horse in open spaces - I also like to hike.	view
44.	Horseback riding, running	view
45.	I hike, ride horses, ride bikes and study the stars. I moved to Manassas 10 years ago because of the open space available locally. I currently live in the Signal Hill/Arrow Wood community. I am looking to move to another area, perhaps Catlett because of the over building and lack of concern for nature lovers such as myself.	view
46.	Hiking, horse-back riding, nature studies.	view
47.	For hiking, walking (both alone and with my dog), horse-back riding, photography, enjoying nature, picnics	view

48.	Trail riding, competitive equestrian activities, and hiking.	view
49.	Horseback riding and hiking	view
50.	Trail riding, hiking, frisbee with the kids, spreading out a blanket and reading a book, meditation, prayer.	view
51.	Multi use is the best. (Equestrians, bikers, hikers, et)	view
52.	Exercise of horses and myself. To enjoy any spaces available throughout the county.	view
53.	I enjoy hiking and horseback riding. Because PWC has no real equestrian trails we have to go outside the county to ride.	view
54.	You don't necessarily have to "use" the open space. It will act as a water filter as well as an air filter. Passive uses such as hiking, biking and equestrian trail riding would have minimal impact on this type of open space and preserve it as open space	view
55.	Hiking, horseback riding	view
56.	I use open space to commune with nature in a spiritual sense whether it is by walking or on horseback or visiting historical sites.	view
57.	TO BE USED FOR TRAIL RIDING AND SHOWS	view
58.	I own a horse and enjoy the trails	view
59.	Walking, horseback riding, photography.	view
60.	Picnics, soccer, walking trails, horseback riding, stop and smell the flowers	view
61.	Riding on the trails with my horse and hound	view
62.	Horseback riding, hiking	view
63.	for cross-country or trails.	view
64.	Trail riding with my horses enjoying the beautiful undeveloped open spaces of our county.	view
65.	walking, hiking, viewing	view
66.	I ride my horse on equestrian trails (outside of PWC since our county doesn't have equestrian trails!) I sometimes hike through woods.	view
67.	Ride my horse and occasionally hike	view
68.	Trail riding	view
69.	riding horses and hiking	view
70.	Open space, as defined above, does not exist for the public. However, I use public trails for equestrian activities and hiking.	view
71.	I take walks in it, I took my children when they were young to play at parks, I ride my horses in open space/park land.	view
72.	Ride and walk as much as possible on weekends	view
73.	Habitat, riding trails for horses, cross-recreational purposes for many people to enjoy the pastoral, bucolic views and open space.	view
74.	Trail riding (horse)	view
75.	I like to enjoy it with my horse.	view
76.	A peaceful place for trails for hiking, biking, horseback riding.	view
77.	I and my family use open spaces, both municipal park area and federal park lands for a variety of recreational purposes. (see my response above)	view
78.	For horse trail riding, biking or hiking, multi use trails, Arena, or show facilities for horses	view
79.	Horseback riding or hiking	view
80.	I have a horse and enjoy riding public trails.	view

81.	Horseback riding	view
82.	Walking, hunting, horseback riding, picnics, other similar recreational activities.	view
83.	Recreational. Horse, bike, foot trails.	view
84.	Horse back riding, hiking	view
85.	Birding, hiking, photography	view
86.	Riding horses on trails, camping, hiking and other passive recreation.	view
87.	I use open space for walking, bike riding, and horseback riding. Natural surface multi-use trails are ideal for all three activities.	view
88.	Parks, picnic areas, recreation areas.	view
89.	Both active and passive recreational activities	view
90.	Pastures and woodland. Wildlife flourishes and you get the feeling of being free.	view
91.	Ride horse or walk through.	view
92.	Riding my horse, walking/hiking.	view
93.	With my Stihl chainsaw.	view
94.	For relaxation and for a peace of mind.	view
95.	The value of open space should not be defined solely by public USE - it has an intrinsic value - to filter water, to clear the air, to provide wildlife habitat, to provide visual relief from all the development that is occurring. But I could go birdwatching or go for a walk in it.	view
96.	To visit, observe and learn from and about natural interaction of species while giving them haven. Refreshing spirit after traffic, mobs, work, shopping experience.	view
97.	Actual use would be for passive recreation. However, open space provides values outside of actual use. Let's call it an emotional peacefulness that comes with the presence of the open space and associated wildlife which can be enjoyed regardless of whether you actually use it for recreation.	view
98.	My favorite open space is Burke Lake Park, in Fairfax. That park has facilities for hiking, canoeing, golf, frisby games, and picnicing, etc.	view
99.	walking, bird watching	view
100.	As a place for relaxation, to observe wild life, to spend recreation time with family, to enjoy the view	view
101.	I use open space for hiking, walking and bike riding. Taking walks with my husband and looking for wildlife, enjoying the peace and quiet and destressing. I guess back in the 70's that would be "communing with nature."	view
